YOU DON'T NEED TO KNOW EVERYTHING IN GRC.

YOU JUST NEED TO KNOW WHAT YOU'RE LOOKING AT.

Tolulope Michael

Beginners often open a policy or a control and freeze. They think they're supposed to understand every line.

But GRC isn't about reading fast. It's about reading with purpose.

Tolulope Michael

When reviewing any GRC document, ask:

- What is this control trying to protect?
- What risk is involved?
- What should happen if something goes wrong?

These three questions simplify everything.

Tolulope Michael

You don't become proficient in GRC by memorising terms. You become good by thinking clearly.

Want to understand GRC without overthinking it?

Use the link to understand the options clearly.
