THEY HELP COMPANIES REDUCE RISK

Think of a GRC analyst as the person who constantly asks:

“What could go wrong here... and how do we prevent it?”

THEY REVIEW POLICIES

A GRC analyst checks if:

- People are following the rules
- The rules still make sense
- The rules meet industry standards

THEY TALK TO DIFFERENT TEAMS

This part surprises most beginners.
GRC is NOT a lonely role.

You speak with:

- **IT**
- **HR**
- **Developers**
- **Security team**
- **Even management**

THEY CHECK COMPLIANCE REQUIREMENTS

Every industry (finance, health, tech...) has laws and standards.

Your job is to make sure the company is following them.

THEY HELP FIX SECURITY GAPS

If something is wrong either with a weak password, rules, risky processes, missing controls , the GRC analyst works with tech teams to fix it.

PS: Have you ever considered a GRC path in cybersecurity?
